

We are concerned that new LPFM stations will take priority over current FM Translator services, forcing many translator signals off the air. One such signal is K-LOVE, which is a listener funded service that provides many encouraging and family-friendly programming and music. Our family currently leaves this station playing continuously in our house because it fills the air with wholesome and uplifting message and music. This station will never require a 7 second delay!! The airwaves contain enough suggestive material centered around human sexuality, violence or greed. Please don't displace FM translator programming with other LPFM programming. K-LOVE provides a vital part of our family's everyday living. Thank you.
